

## DARK MODE

**Background color** is the highest contrast possible (**Grey 1000**)  
**Font colors** are very light  
**Accent colors** are also lighter (usually **400** instead of **600**)

The Prisma Postgres landing page in Dark Mode features a dark background with a light globe icon. It highlights "Instant Postgres for Global Applications" and "Built for global workloads". A sidebar on the left shows color swatches for 000 (#FFFFFF), 1000 (#090A15), 500 (#AOAE00), 000 (#FFFFFF), and 200 (#EDF2F7). A central section for "Built for flexibility" includes a diagram of three databases and a code snippet.

## LIGHT MODE

**Background color** is usually white, or slight gradient (**Grey 000**)  
**Font colors** are dark (**Grey 600-800**)  
**Accent colors** are usually on the **600** frame

The Prisma ORM landing page in Light Mode features a white background with a light blue header bar. It highlights "Next-generation Node.js and TypeScript ORM" and "Delightful DB workflows". A sidebar on the left shows color swatches for 800 (#2D3748), 000 (#FFFFFF), 600 (#718096), 800 (#2D3748), and 700 (#4A5568). A central section for "Works with your favorite databases and frameworks" shows compatibility with various tools like MySQL, GraphQL, and Apollo.
